## Education

DevMountain Program  
Certificate in Web Development,  
Strayer University, US, 2020

## Languages

English - Fluent

Spanish - Basic

## Industry Experience

Automotive - Experienced

Industrial Products - Entry

## Profile

Accomplished Senior Software Developer with over 10 years of experience building enterprise-scale solutions and driving automation initiatives that deliver measurable business impact. Proven track record of creating technology-driven efficiencies that generate significant annual savings and increased sales performance in previous roles. Expertise spans full-stack development, software architecture, and business process optimization. Passion for learning new technologies, improving developer experience, and solving complex business problems through innovative software solutions. Strong background in React, Node.js, and .NET combined with entrepreneurial experience in building and scaling technology solutions from concept to production.

## Key skills

### Enterprise Software Development:

Extensive experience in designing and implementing large-scale software solutions that serve enterprise clients and support critical business operations. Demonstrated ability to work within complex technical environments and deliver robust, scalable applications that meet stringent performance and reliability requirements.

### Software Architecture and Design:

Proven expertise in creating well-structured software architectures that balance performance, maintainability, and scalability. Skilled in making strategic technical decisions that support long-term business objectives while ensuring code quality and system integrity across diverse technology stacks.

### Full-Stack Web Development:

Comprehensive proficiency in modern web technologies including React, Angular, Node.js, NestJS, .NET, and Blazor. Experience building complete web applications from user interface design through database integration and deployment, with a focus on creating seamless user experiences.

### Business Process Automation:

Exceptional ability to identify inefficiencies in existing workflows and develop technology solutions that streamline operations. Successfully implemented automation initiatives that reduced labor costs and improved processing times across multiple business functions, demonstrating strong analytical and problem-solving capabilities.

### Project Leadership and Team Management:

Proven track record of leading technical teams and managing complex projects from conception through delivery. Experience in coordinating cross-functional initiatives, mentoring junior developers, and ensuring project milestones are met while maintaining high quality standards.

#### Client Relationship Management:

Strong background in understanding client needs and translating business requirements into technical solutions. Excellent communication skills enable effective collaboration with stakeholders at all levels, from technical teams to executive leadership.

#### Entrepreneurial and Business Acumen:

Unique combination of technical expertise and business understanding gained through entrepreneurial experience managing a photography business and driving process improvements in automotive sales environments. This perspective enables the development of technology solutions that directly address real-world business challenges and deliver measurable value.

## Work experience

### Senior Software Developer

IBM, United States | Feb 2025 - Present

Consultant for IBM

### Senior Software Developer

Dialexa, United States | Jun 2022 - Feb 2025

Consultant

### Software Engineer

TrackNow, Inc. DBA Covr, United States | Dec 2020 - Jun 2022

Covr is a workforce management platform built for long term, post-acute care facilities.

- Led modernization effort to transition a legacy monolithic application to microservices via the strangler pattern.
- Built mass-messaging platform

### Business Process and Systems Manager

Sonic Automotive DBA Echo Park, United States | Sep 2015 - Mar 2020

- Built and maintained employee portal website.
- Created technology-driven operating efficiencies, which helped reduce approximately 30% of labor time, saving the business \$7.5MM dollars annually and \$30MM over 4 years.
- Increased sales efficiency of each salesperson by approximately 30%, resulting in incremental 1,100 more cars sold monthly (400 to 1,500) in a single location.
- Generated and maintained metric reporting for Sales, Finance, Procurement, and Reconditioning departments.
- Reduced average funding time by automating the process workflow.
- Led effort to transition CRM and internal systems after Sonic acquisition

## Assignment history

### Senior Software Developer

Tax Advisors Group, United States | Jul 2024 - May 2025

Project name: Ava

Built the next generation platform for Tax Advisor Group to enable expansion of its property tax business to clients outside of Texas.

Tech stack: .NET + Blazor

Contribution

- Built, tested, and deployed Freeport Tax Exemption feature.
  - Enables TAG consultants to determine if client qualifies for the exemption.
  - Generates the appropriate forms based on the client's tax jurisdiction.
  - Escalates forms for supervisor approval.
  - Generates mailer and sends to appropriate tax office via external integration.
  - Obtaining this exemption accounts for ~30% of all of TAG's revenue.
- Implemented live debugging tool for test environment substantially improving our quality team's manual testing speed and accuracy.

### **Senior Software Developer**

DELOITTE, United States | Jun 2022 - Jun 2024

Project name: About Me

AboutMe is a global tax application to assist Deloitte Professionals file taxes in over 53 countries and 6 languages.

Tech stack: .NET back-end + Angular front-end

Contribution

- Led cloud modernization effort to transition backend from .NET framework to .NET core.
- Built several automation scripts saving the client countless man hours.
- Implemented dependency graph driven pub-sub pattern on front end implementation of conditional question logic.
- Made several improvements to the business content process flow.
